Quick start

1. Choose and read a workout

Choose a workout and follow its steps from top to bottom. Bold text at right is the prescription; smaller text is a cue. “Continue →” means the workout continues. Header distance sums prescribed distances only. Duration includes rest when every step is timed; otherwise it is variable.

2. Work, repeat, rest

Do each step in order. Repeat every step inside a Repeat block the stated number of times. Rest means stop exercising for the written time; easy recovery with an intensity target means keep moving. Example: “8min @ 95%THR” means eight minutes at 95% of your own threshold heart rate—not maximum heart rate.

3. Use the conversion charts

For a percentage target, choose the chart named by the target, find your own reference value in the first column, then read across to the percentage. Values are reference × percentage ÷ 100, rounded to a whole unit. The charts are lookups only: keep the written target, and do not substitute one reference for another.

Glossary

FTP: Functional threshold power: the cycling power baseline used by %FTP targets. W means watts, the unit of power.

THR / Threshold HR: Threshold heart rate: the heart-rate baseline used by %THR targets. THR is not HRmax.

HRmax / MaxHR: Maximum heart rate: the highest heart-rate baseline used by %HRmax targets; it is distinct from THR.

HR; bpm / BPM: Heart rate; beats per minute. A target such as 150bpm is an absolute heart-rate value, not a percentage.

RPE / RIR: Rating of perceived exertion (RPE) uses 1–10; RIR is repetitions in reserve. For lifting sets, RPE 7/8/9 means about 3/2/1 clean reps left. Running RPE describes overall effort, not reps left. Power exercises stop before speed or technique declines; do not chase failure.

rpm / RPM: Revolutions per minute: cycling cadence, or pedal turns each minute. It is not BPM.

CSS: Critical Swim Speed: an individually estimated swim pace. The swim assessment shows CSS = (400 m time − 200 m time) ÷ 2, in seconds per 100 m. Record CSS manually; the app's threshold view is read-only and does not write it automatically.

VO2: Oxygen uptake; in this catalog, VO2 Max names high-intensity workout sessions rather than a target unit.

%: A percentage target is anchored to your own named baseline: %FTP uses FTP, %THR uses threshold heart rate, and %HRmax uses maximum heart rate. Those baselines are not interchangeable.

min; sec: Minutes; seconds. For example, 2min 30sec is two minutes and 30 seconds.

m; km: Metres; kilometres. Reps means repetitions, a count rather than time or distance.

Pace notation: 5:00/km means five minutes per kilometre. The CSS assessment uses seconds/100 m; both express time per distance.

5K: Five kilometres.

WORKOUT CATALOG

Tests

Cycling FTP Assessment

12

Distance: Not prescribed · Duration: 66 min

Hard test for prepared, healthy athletes; stop if unwell.
During test: record average power for 30 min. At exactly 30:00, lap and record this test interval only, including zeros; do not use normalized power or include warm-up/cool-down.
Result: use that wattage as your FTP estimate (240 W → 240 W).

Easy warm-up — **15**min @ **3 RPE**
Ride easy at RPE 2–3.

Repeat block — 3×

- **High cadence** — **1**min @ **5 RPE**
  Controlled high cadence.
- **Easy spin** — **1**min @ **2 RPE**

Easy settle — **5**min @ **2 RPE**

FTP test — **30**min @ **9 RPE**
Start controlled; hold your hardest even effort for 30 minutes. Record the result as described above.

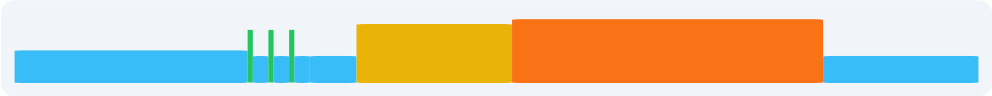

Cooldown — **10**min @ **2 RPE**

Running Threshold Pace Assessment

13

Distance: Not prescribed · Duration: 62 min

Hard test for prepared, healthy athletes; stop if unwell.
Pace: 30 min ÷ distance in km (6 km → 5:00/km).
Optional threshold HR: average of final 20 min.

Easy warm-up — **15**min @ **3 RPE**

Repeat block — **3×**

- **Controlled stride** — **20**sec @ **7 RPE**
  Smooth, controlled—not a sprint.
- **Easy jog** — **1**min @ **2 RPE**

Easy settle — **3**min @ **2 RPE**

Threshold test — **10**min @ **8 RPE**
Begin controlled and settle into a hard, even race effort; no sprint start.

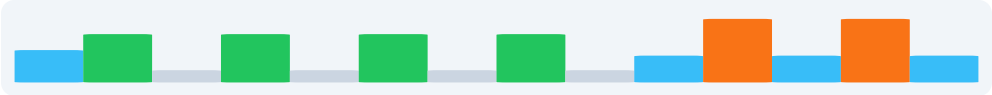

Threshold test — **20**min @ **9 RPE**
Continue without rest. At 30:00, lap and record whole-test distance; separately capture average heart rate for this final 20-minute interval.

Cooldown — **10**min @ **2 RPE**

Swimming CSS Assessment — 400 m / 200 m

Distance: 1.6 km | Duration: Variable

Hard test for prepared, healthy athletes; stop if unwell.
Record 400 m and 200 m times in seconds.
CSS = (400 m time − 200 m time) ÷ 2, seconds/100 m.
7:00 and 3:20 → 1:50/100 m.

Easy warm-up — **400**m @ **3 RPE**
Swim easy freestyle and finish with a long, relaxed stroke.

Repeat block — 4×

Build swim — **50**m @ **6 RPE**
Swim freestyle from easy to strong while preserving stroke length.

Timed rest — **20**sec @ **Rest**
Rest at the wall for 20 seconds before the next build swim.

Easy preparation — **200**m @ **2 RPE**
Swim easy freestyle with calm breathing before the time trial.

Time trial — **400**m @ **9 RPE**
Steady hard push; record the complete 400 m time.

Continue →

Swimming CSS Assessment — 400 m / 200 m · continued

Active recovery — **5**min @ **2 RPE**

Very easy swimming. Be fully recovered before the 200 m; if you need longer, extend recovery manually and record the actual timed test intervals.

Time trial — **200**m @ **9 RPE**

Steady hard push; record the complete 200 m time.

Cooldown — **200**m @ **2 RPE**

Swim down easy freestyle or backstroke.

WORKOUT CATALOG

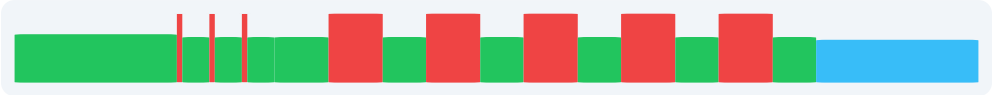

Cycling

VO2 Max Development

17

Distance: Not prescribed | Duration: 89 min

89-minute activity with challenging VO2 max intervals

Progressive Warm-up — **15**min @ **60%**FTP

Start easy and build gradually. Include some leg openers.

Repeat block — 3×

- **Activation Effort** — **30**sec @ **120%**FTP
  Hard but controlled effort
- **Recovery** — **2**min **30**sec @ **55%**FTP
  Complete recovery before next effort

Preparation — **5**min @ **55%**FTP

Mental preparation for the main set

Repeat block — 5×

- **VO2 Max Interval** — **5**min @ **110%**FTP
  Sustained effort at VO2 max power. Focus on smooth breathing.
- **Recovery** — **4**min @ **55%**FTP
  Active recovery. Heart rate should come down significantly.

Cool-down — **15**min @ **50%**FTP

Take time to cool down properly after intense efforts

Sprint Power Development

18

Distance: Not prescribed | Duration: 73 min

Short activity focusing on neuromuscular power and sprint development

Progressive Warm-up — **15**min @ **60%**FTP

Include some higher cadence work to prepare for sprints

Repeat block — 3×

- **Sprint Opener** — **10**sec @ **10 RPE**
  All-out sprint from moderate speed
- **Recovery** — **3**min **50**sec @ **55%**FTP
  Complete recovery

Repeat block — 6×

- **Max Sprint** — **15**sec @ **10 RPE**
  All-out sprint - maximum power output
- **Recovery** — **5**min **45**sec @ **50%**FTP
  Complete recovery is essential for quality

Cool-down — **10**min @ **50%**FTP

Easy spinning to flush lactate

Threshold Heart Rate Intervals

19

Distance: Not prescribed | Duration: 55 min

55-minute indoor trainer activity focused on threshold heart rate intervals. Maintain steady cadence of 85-95 RPM and target threshold HR zones during main intervals.

Easy Warm-up — **10**min @ **60%**THR

Spin easy, focus on smooth pedaling and preparing the legs

Gradual Build — **5**min @ **75%**THR

Steadily increase intensity to get near threshold

Repeat block — 4×

- **Threshold Interval** — **5**min @ **100%**THR
  Maintain steady cadence, focus on consistent threshold effort
- **Recovery** — **2**min **30**sec @ **65%**THR
  Spin easy to recover, prepare for next interval

Cool-down — **10**min @ **55%**THR

Spin easy, focus on relaxed breathing and form

Sweet Spot Intervals

20

Distance: Not prescribed | Duration: 70 min

Classic sweet spot activity with 3x10min intervals at 90% FTP

Warm-up — **10**min @ **60%**FTP
Easy spin to warm up

Build — **5**min @ **75%**FTP
Gradually increase intensity

Repeat block — 3×

- **Sweet Spot** — **10**min @ **90%**FTP
  Steady effort in sweet spot zone
- **Recovery** — **5**min @ **55%**FTP
  Easy recovery spin

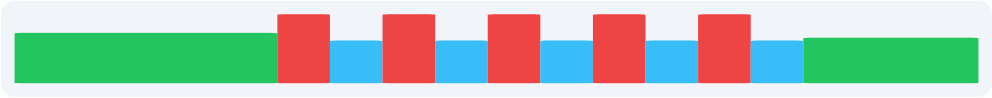

Cooldown — **10**min @ **50%**FTP
Easy spin to cool down

VO2 Max Intervals

21

Distance: Not prescribed | Duration: 55 min

5x3min at 120% FTP with 3min recovery - High intensity aerobic capacity development

Warm-up — **15**min @ **65%**FTP

Repeat block — 5×

- **Hard** — **3**min @ **120%**FTP
  Maximum sustainable effort
- **Recovery** — **3**min @ **50%**FTP
  Full recovery

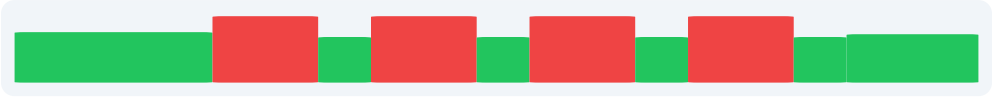

Cooldown — **10**min @ **55%**FTP

FTP Intervals

22

Distance: Not prescribed | Duration: 73 min

4x8min at 95% FTP (threshold) - Build sustainable power at threshold

Warm-up — **15**min @ **65%**FTP

Repeat block — 4×

- **Threshold** — **8**min @ **95%**FTP
  At threshold - max sustainable for 1 hour
- **Recovery** — **4**min @ **55%**FTP

Cooldown — **10**min @ **60%**FTP

Outdoor Sweet Spot Intervals

23

Distance: Not prescribed | Duration: 85 min

Outdoor ride with sweet spot power intervals

Warm-up — **15**min @ **55%**FTP

Start easy and gradually build intensity

Repeat block — 3×

- **Sweet Spot Interval** — **15**min @ **90%**FTP
  Maintain steady power in sweet spot zone (85-90% FTP)
- **Easy Recovery** — **5**min @ **50%**FTP
  Easy spinning to recover between intervals

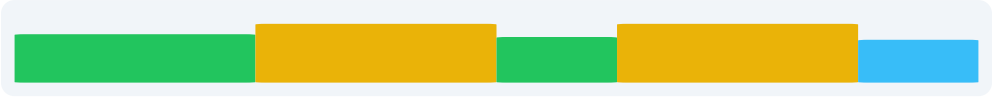

Cool-down — **10**min @ **50%**FTP

Easy spinning to bring heart rate down

Tempo Intervals

Distance: Not prescribed | Duration: 80 min

Outdoor ride with sustained tempo efforts

Progressive Warm-up — **20**min @ **60%**FTP

Gradually increase effort to prepare for tempo work

Tempo Block 1 — **20**min @ **80%**FTP

Steady tempo effort - should feel moderately hard but sustainable

Easy Recovery — **10**min @ **55%**FTP

Easy spinning to recover

Tempo Block 2 — **20**min @ **80%**FTP

Maintain same effort as first block

Cool-down — **10**min @ **50%**FTP

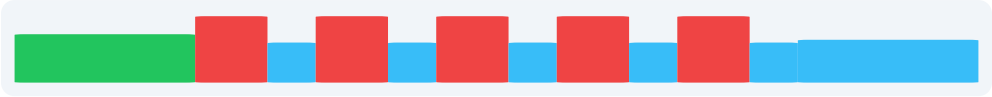

Easy spinning to normalize heart rate

Climbing Intervals

25

Distance: Not prescribed | Duration: 80 min

High-intensity climbing intervals for outdoor terrain

Warm-up — **15**min @ **60%**FTP

Include some brief higher efforts to open the legs

Repeat block — 5×

- **Climbing Interval** — **6**min @ **95%**FTP
  Find a good climb and push hard - aim for threshold power
- **Recovery Descent** — **4**min @ **45%**FTP
  Use terrain to recover - easy spinning or coasting

Cool-down — **15**min @ **50%**FTP

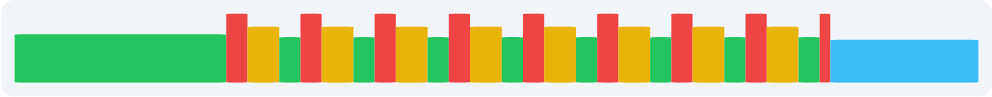

Easy spinning on flat terrain to recover

Group Ride Simulation

26

Distance: Not prescribed | Duration: 91 min

Variable intensity ride simulating group ride dynamics

Group Warm-up — **20**min @ **60%**FTP

Conversational pace as group gets organized

Repeat block — 8×

Attack/Chase — **2**min @ **100%**FTP

Hard effort to simulate attacks or bridging gaps

Group Tempo — **3**min @ **75%**FTP

Steady pace as group settles after effort

Easy Spinning — **2**min @ **55%**FTP

Easy spinning in the bunch

Sprint Finish — **1**min @ **10 RPE**

Give your best effort over the full minute to simulate a group ride finish; maintain bike control rather than trying to hold peak sprint power throughout.

Cool-down Spin — **14**min @ **50%**FTP

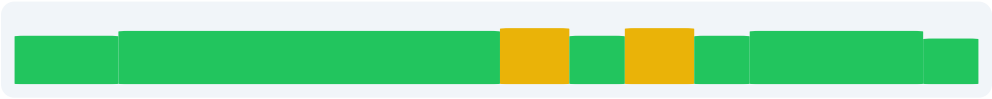

Easy spinning to cool down after efforts

Progressive Long Endurance Ride

27

Distance: Not prescribed | Duration: 139 min

Long endurance ride with steady tempo lifts to build late-ride durability.

Warm-up — **15**min @ **60%**FTP
Start relaxed and build cadence smoothly.

Settled Endurance — **55**min @ **70%**FTP
Lock into conversational endurance riding.

Repeat block — 2×

- **Tempo Lift** — **10**min @ **75%**FTP
  Raise pressure without drifting above controlled tempo.
- **Easy Reset** — **8**min @ **60%**FTP
  Recover while keeping pedals moving.

Steady Finish — **25**min @ **70%**FTP
Finish with durable aerobic pressure, not a fade.

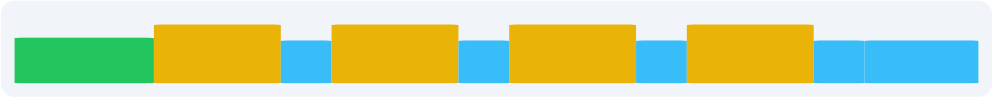

Cooldown — **8**min @ **55%**FTP
Spin out the legs before ending the ride.

Tempo Control Intervals

28

Distance: Not prescribed | Duration: 76 min

Controlled tempo intervals that improve sustained power without threshold-level fatigue.

Warm-up — **11**min @ **55%**FTP

Build cadence gradually and confirm that the intended target is appropriate today.

Repeat block — 4×

Work — **10**min @ **80%**FTP

Settle quickly, keep cadence stable, and avoid power spikes at the start of each interval.

Recovery — **4**min @ **50%**FTP

Pedal easily until breathing and movement quality are ready for the next effort.

Cooldown — **9**min @ **50%**FTP

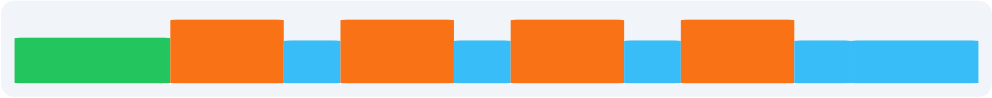

Reduce pressure progressively and finish with relaxed, smooth pedaling.

Threshold Power Intervals

29

Distance: Not prescribed | Duration: 68 min

Threshold intervals that build sustainable race power and tolerance for prolonged pressure.

Warm-up — **11**min @ **55%**FTP

Build cadence gradually and confirm that the intended target is appropriate today.

Repeat block — 4×

Work — **8**min @ **90%**FTP

Ride close to threshold with controlled breathing and repeatable power through the final interval.

Recovery — **4**min @ **50%**FTP

Pedal easily until breathing and movement quality are ready for the next effort.

Cooldown — **9**min @ **50%**FTP

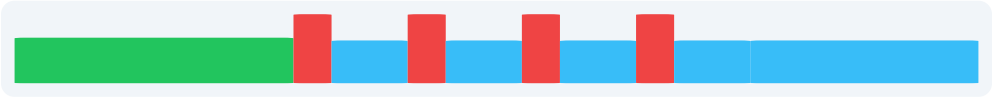

Reduce pressure progressively and finish with relaxed, smooth pedaling.

Anaerobic Repeatability

30

Distance: Not prescribed | Duration: 38 min

Short anaerobic efforts that develop repeatable surges for climbs, attacks, and race changes.

Warm-up — **11**min @ **55%**FTP

Build cadence gradually and confirm that the intended target is appropriate today.

Repeat block — 4×

Work — **1**min **30**sec @ **110%**FTP

Accelerate decisively, then hold form and torque without fading through the final seconds.

Recovery — **3**min @ **50%**FTP

Pedal easily until breathing and movement quality are ready for the next effort.

Cooldown — **9**min @ **50%**FTP

Reduce pressure progressively and finish with relaxed, smooth pedaling.

Neuromuscular Sprint Set

31

Distance: Not prescribed | Duration: 36 min

Neuromuscular sprint repetitions that develop peak cycling power with complete recovery.

Warm-up — **11**min @ **55%**FTP

Build cadence gradually and confirm that the intended target is appropriate today.

Repeat block — 4×

Work — **15**sec @ **125%**FTP

Sprint with excellent posture and fast force production; stop if power or technique deteriorates.

Recovery — **3**min **45**sec @ **50%**FTP

Pedal easily until breathing and movement quality are ready for the next effort.

Cooldown — **9**min @ **50%**FTP

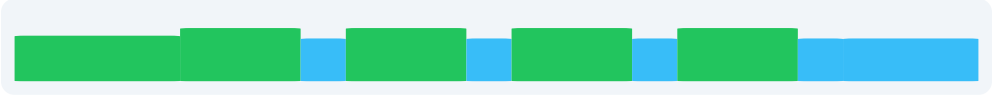

Reduce pressure progressively and finish with relaxed, smooth pedaling.

Cadence Endurance Blocks

32

Distance: Not prescribed | Duration: 64 min

Endurance blocks with deliberate cadence changes that build aerobic efficiency without relying on one steady gear.

Warm-up — **11**min @ **55%**FTP

Build cadence gradually and confirm that the intended target is appropriate today.

Repeat block — 4×

Work — **8**min @ **70%**FTP **90**rpm

Hold a smooth, even pedal stroke while maintaining aerobic pressure.

Recovery — **3**min @ **50%**FTP

Pedal easily until breathing and movement quality are ready for the next effort.

Cooldown — **9**min @ **50%**FTP

Reduce pressure progressively and finish with relaxed, smooth pedaling.

WORKOUT CATALOG

Running

Threshold Run Development 1

34

Distance: Not prescribed · Duration: 57 min

Indoor treadmill session focusing on threshold heart rate intervals

Progressive Warm-up — **15**min @ **60%**THR

Easy pace jogging to prepare legs and lungs

Repeat block — 4×

- **Threshold Interval** — **5**min @ **95%**THR
  Steady effort at high intensity
- **Active Recovery** — **3**min @ **70%**THR
  Jog very easily; walk briefly if needed. Let heart rate fall naturally rather than chasing the target immediately after the effort.

Cool-down — **10**min @ **70%**THR

Relaxed pace to flush lactate

Threshold Run Development 2

35

Distance: Not prescribed · Duration: 67 min

Longer indoor treadmill threshold session with progressive intervals

Warm-up Jog — **15**min @ **60%**THR

Gradually increase speed to prep for intervals

Repeat block — 3×

- **Long Threshold Interval** — **8**min @ **95%**THR
  Maintain pace comfortably hard
- **Recovery Jog** — **5**min @ **60%**THR
  Jog very easily with relaxed breathing. Let heart rate fall naturally; do not speed up to chase the recovery target.

Short Threshold Push — **3**min @ **95%**THR

Push pace for short duration

Cool-down — **10**min @ **60%**THR

Relaxed pace to normalize heart rate

Speed Intervals

36

Distance: Not prescribed | Duration: 55 min

High-intensity speed intervals for VO2 max development

Progressive Warm-up — **15**min @ **65%**THR

Include some strides in final 5 minutes to prepare for speed

Repeat block — **6×**

Speed Interval — **3**min @ **105%**THR

Fast pace - should feel hard but controlled

Recovery Jog — **2**min @ **65%**THR

Jog very easily; walk briefly if needed to regain controlled breathing before the next fast interval.

Cool-down — **10**min @ **60%**THR

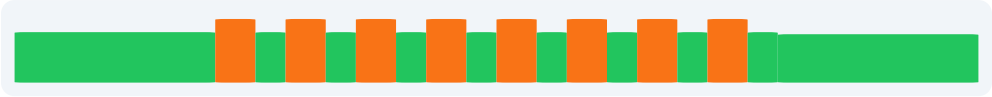

Easy pace to bring heart rate down

Hill Intervals

37

Distance: Not prescribed | Duration: 48 min

Incline-based intervals for strength and power development

Flat Warm-up — **10**min @ **65%**THR

Start on 0% grade, gradually increase pace

Repeat block — 8×

- **Hill Climb** — **2**min @ **90%**THR
  Increase incline to 6-8%, maintain strong effort uphill
- **Recovery Descent** — **1**min **30**sec @ **65%**THR
  Return to 0% grade, easy jog to recover

Cool-down — **10**min @ **60%**THR

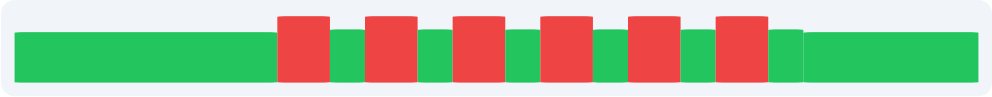

Flat grade, easy pace to cool down

5K Pace Intervals

38

Distance: Not prescribed | Duration: 55 min

High-intensity intervals at 5K race pace

Warm-up — **15**min @ **65%**THR

Start easy and gradually build pace

Repeat block — 6×

- **5K Pace Interval** — **3**min @ **95%**THR
  Run at your 5K race pace - this should feel hard
- **Recovery Jog** — **2**min @ **70%**THR
  Active recovery - keep moving but very easy

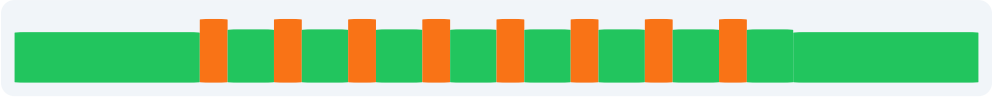

Cool-down — **10**min @ **65%**THR

Easy pace to bring heart rate down

Fartlek Training

Distance: Not prescribed · Duration: 52 min

Unstructured speed play with varied intensities

Warm-up — **10**min @ **65%**THR

Start easy and prepare for varied efforts

Repeat block — 8×

- **Hard Surge** — **1**min **30**sec @ **90%**THR
  Surge to hard effort - use terrain and feel
- **Easy Recovery** — **2**min **30**sec @ **70%**THR
  Relax and recover between surges

Cool-down — **10**min @ **65%**THR

Easy pace to bring heart rate down

Threshold Intervals

40

Distance: 6 km | Duration: Variable

6x1km at 95% threshold heart rate with 2min recovery - Build speed endurance

Warm-up — **15**min @ **65%**THR

Repeat block — 6×

- **Fast** — **1**km @ **95%**THR
  Threshold pace
- **Recovery** — **2**min @ **60%**THR
  Easy jog

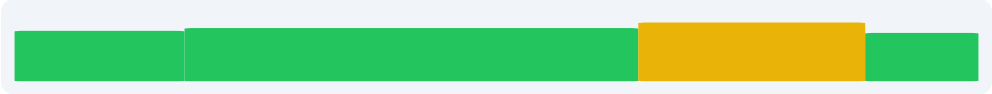

Cooldown — **10**min @ **60%**THR

Marathon Pace Long Run

41

Distance: Not prescribed | Duration: 85 min

Long run with controlled marathon-pace segments to build race-specific durability.

Warm-up — **15**min @ **65%**THR

Ease in and settle into relaxed aerobic rhythm.

Aerobic Settling — **40**min @ **70%**THR

Stay smooth and controlled before race-pace work begins.

Marathon Pace — **20**min @ **80%**THR

Controlled race pace with strong form and even effort.

Cooldown — **10**min @ **60%**THR

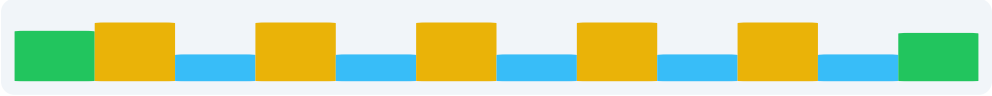

Relax the pace and finish under control.

Track 100m Strides

42

Distance: 2.6 km | Duration: Variable

Classic track strides session: easy distance warmup, 5x100m fast relaxed strides, 100m walk recoveries, and easy distance cooldown.

Warm-up — **800**m @ **65%**THR

Two easy laps before controlled fast running.

Repeat block — 5×

Fast Stride — **100**m @ **8 RPE**

Fast but relaxed on the straightaway; focus on form, not sprinting.

Walk Recovery — **100**m @ **2 RPE**

Walk back to the starting line on a permitted route clear of active lanes; never reverse against track traffic.

Cooldown — **800**m @ **60%**THR

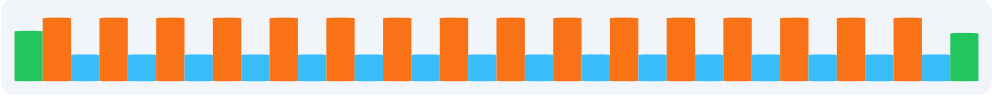

Two easy laps to finish loose.

Track 200m Repeats

43

Distance: 9.6 km | Duration: Variable

Turnover-focused 16x200m track activity with equal-distance 200m jog recoveries.

Warm-up — **1.6**km @ **65%**THR

Four easy laps before the repeat set.

Repeat block — **16×**

Fast 200m — **200**m @ **9 RPE**

Fast, smooth, and controlled; keep mechanics crisp.

Recovery 200m — **200**m @ **2 RPE**

Jog the remaining 200 m around the track to your original starting line.

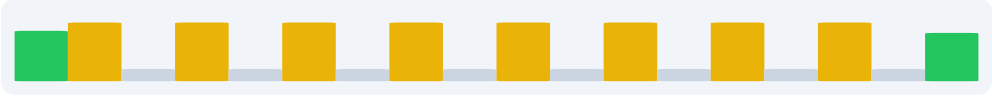

Cooldown — **1.6**km @ **60%**THR

Track 400m Repeats

44

Distance: 6.4 km | Duration: Variable

Staple 8x400m track session for 5K/10K speed, with 60-second rests near the starting line.

Warm-up — **1.6**km @ **65%**THR

Four easy laps with drills or strides if desired.

Repeat block — 8×

Fast 400m — **400**m @ **8 RPE**

One lap at controlled 10K to 5K effort.

Rest — **1**min @ **Rest**

Rest near the starting line, clear of active lanes; return to the line for the next rep.

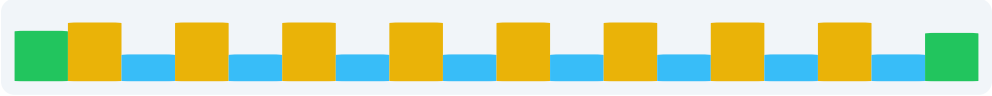

Cooldown — **1.6**km @ **60%**THR

Track Yasso 800s

45

Distance: 14.4 km | Duration: Variable

Well-known marathon benchmark activity: 8x800m at comfortably hard threshold effort with 400m jog recoveries.

Warm-up — **3.2**km @ **65%**THR

Eight easy laps before the benchmark set.

Repeat block — 8×

800m Repeat — **800**m @ **8 RPE**

Two laps at a consistent comfortably hard effort.

Recovery 400m — **400**m @ **2 RPE**

One easy lap recovery; keep it relaxed.

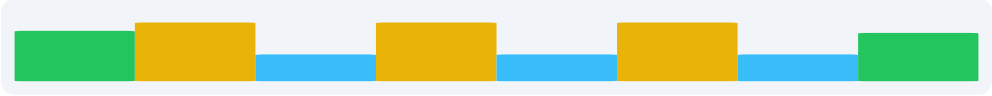

Cooldown — **1.6**km @ **60%**THR

Track Mile Repeats

46

Distance: 9.2 km | Duration: Variable

Popular distance-runner benchmark: 3x1600m with 400m jog recoveries for pacing control and race-specific endurance.

Warm-up — **1.6**km @ **65%**THR

Repeat block — 3×

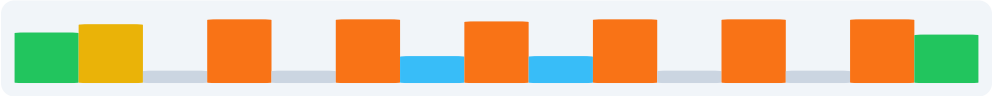

- **1600m Repeat** — **1.6**km @ **8 RPE**
  Four laps just slower than 5K effort; prioritize even pacing.
- **Recovery 400m** — **400**m @ **2 RPE**
  One lap easy jog recovery.

Cooldown — **1.6**km @ **60%**THR

Track Ladder Activity

Distance: 10.4 km | Duration: Variable

Classic track ladder progressing through 400m, 800m, 1200m, 1600m, then back down, using 90-second rests and full-lap recovery jogs to preserve the starting point.

Warm-up — **1.6**km @ **65%**THR
Four easy laps before the ladder.

400m — **400**m @ **8 RPE**

Rest — **1**min **30**sec @ **Rest**
Rest near the starting line, clear of active lanes; return to the line for the next rep.

800m — **800**m @ **90%**THR

Rest — **1**min **30**sec @ **Rest**
Rest near the starting line, clear of active lanes; return to the line for the next rep.

1200m — **1.2**km @ **90%**THR

Recovery 400m — **400**m @ **2 RPE**

1600m — **1.6**km @ **85%**THR

Continue →

Track Ladder Activity · continued

Recovery 400m — **400**m @ **2 RPE**

1200m — **1.2**km @ **90%**THR

Rest — **1**min **30**sec @ **Rest**

Rest near the starting line, clear of active lanes; return to the line for the next rep.

800m — **800**m @ **90%**THR

Rest — **1**min **30**sec @ **Rest**

Rest near the starting line, clear of active lanes; return to the line for the next rep.

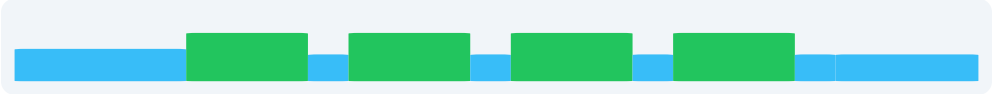

400m — **400**m @ **9 RPE**

Cooldown — **1.6**km @ **60%**THR

Cruise Tempo Run

Distance: Not prescribed | Duration: 67 min 20 sec

Controlled tempo repetitions that develop sustainable speed below threshold strain.

Warm-up — **12**min @ **3 RPE**

Jog easily and include mobility drills before faster running.

Repeat block — 4×

Work — **8**min **30**sec @ **6 RPE**

Run tall at controlled tempo effort; preserve your mechanics through every repetition.

Recovery — **2**min **50**sec @ **2 RPE**

Jog very easily throughout recovery; keep it conversational rather than turning it into another tempo effort.

Cooldown — **10**min @ **2 RPE**

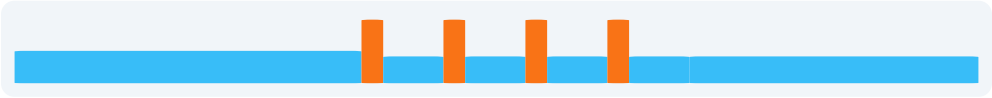

Jog easily, then walk until breathing settles.

Anaerobic Hill Surges

50

Distance: Not prescribed | Duration: 33 min 20 sec

Short hill surges that develop repeatable anaerobic power with full form-focused recovery.

Warm-up — **12**min @ **3 RPE**

Jog easily and include mobility drills before faster running.

Repeat block — 4×

Work — **45**sec @ **9 RPE**

Run tall through each hill surge; preserve your mechanics through every repetition.

Recovery — **2**min **5**sec @ **2 RPE**

Walk or jog gently downhill. Start the next surge only with controlled breathing and stable form; extend recovery if needed.

Cooldown — **10**min @ **2 RPE**

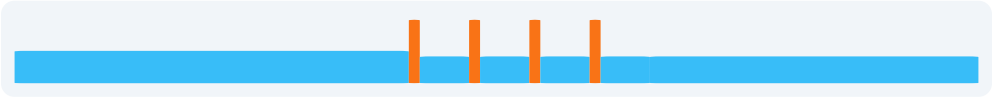

Jog easily, then walk until breathing settles.

Neuromuscular Strides

51

Distance: Not prescribed · Duration: 29 min 20 sec

Brief relaxed strides that sharpen coordination and leg speed without accumulating lactate.

Warm-up — **12**min @ **3 RPE**

Jog easily and include mobility drills before faster running.

Repeat block — 4×

Work — **20**sec @ **9 RPE**

Keep strides quick and relaxed; run tall and preserve your mechanics through every repetition.

Recovery — **1**min **30**sec @ **2 RPE**

Walk or jog very easily until breathing settles. Keep each stride relaxed and quick; extend recovery rather than sprinting fatigued.

Cooldown — **10**min @ **2 RPE**

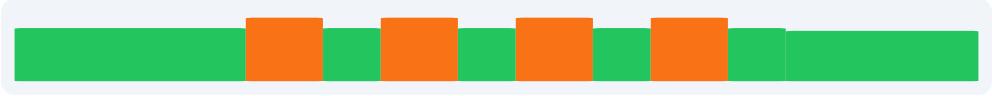

Jog easily, then walk until breathing settles.

Norwegian 4×4 Run

52

Distance: Not prescribed · Duration: 50 min

A controlled Norwegian-style aerobic-power session with bounded repeat and active-recovery states.

Warm-up — **12**min @ **70%**HRmax

Repeat block — 4×

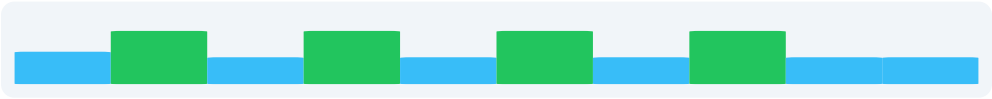

- **Work** — **4**min @ **90%**HRmax
  Build into 90–95% HRmax without sprinting the first minute.
- **Active Recovery** — **3**min @ **70%**HRmax
  Jog easily at about 70% HRmax; recover actively rather than standing still.

Cooldown — **10**min @ **65%**HRmax

Norwegian Controlled Threshold Long Repeats

Distance: 8 km | Duration: Variable

A controlled sub-threshold long-repeat session with coordinated volume and float-recovery states.

Warm-up — **15**min @ **3 RPE**

Repeat block — **4×**

- **Controlled Work** — **2**km @ **7 RPE**
  Hold a repeatable sub-threshold effort at RPE 6–7; slow down if the individual calibration is no longer controlled.
- **Float Recovery** — **1**min @ **2 RPE**
  Use an easy jog float; do not turn the recovery into a full stop.

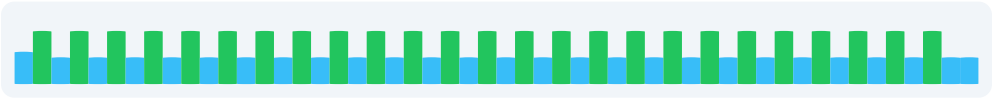

Cooldown — **10**min @ **2 RPE**

Norwegian 25×400 Controlled Threshold

54

Distance: 10 km | Duration: Variable

A separately identified 25-by-400-metre Norwegian controlled-threshold protocol.

Warm-up — **15**min @ **3 RPE**

Repeat block — **25×**

- **Controlled Work** — **400**m @ **7 RPE**
  Hold a repeatable sub-threshold RPE 6–7; this distinct short-repeat protocol is not a long-repeat dose state.
- **Float Recovery** — **30**sec @ **2 RPE**
  Use an easy jog float between controlled repeats.

Cooldown — **10**min @ **2 RPE**

WORKOUT CATALOG

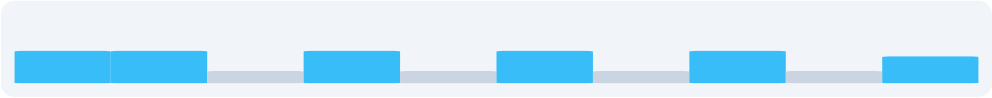

Swimming

Recovery Feel Swim

56

Distance: 1.4 km | Duration: Variable

Easy swimming that restores feel for the water and relaxed alignment.

Warm-up — **350**m @ **3 RPE**

Swim easy freestyle; use catch-up drill for the first 50 m, then settle into a long, relaxed stroke.

Repeat block — 4×

Work — **200**m @ **3 RPE**

Easy swimming that restores feel for the water and relaxed alignment. Hold the prescribed effort only while stroke length and breathing remain controlled.

Recovery — **15**sec @ **Rest**

Rest at the wall; start the next repeat with calm breathing and deliberate form.

Cooldown — **250**m @ **2 RPE**

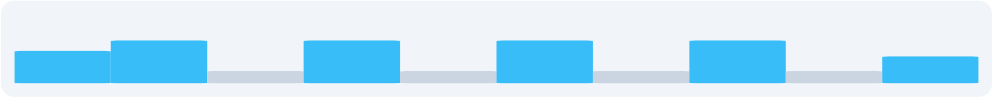

Swim down easily and finish before technique degrades.

Aerobic Continuity Swim

57

Distance: 2.2 km | Duration: Variable

Continuous aerobic repeats that develop economical, repeatable freestyle.

Warm-up **350**m @ **3 RPE**

Swim easy freestyle; use catch-up drill for the first 50 m, then settle into a long, relaxed stroke.

Repeat block 4×

Work **400**m @ **5 RPE**

Continuous aerobic repeats that develop economical, repeatable freestyle. Hold the prescribed effort only while stroke length and breathing remain controlled.

Recovery **25**sec @ **Rest**

Rest at the wall; start the next repeat with calm breathing and deliberate form.

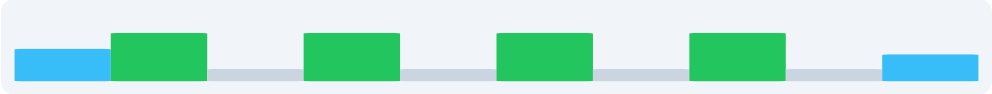

Cooldown **250**m @ **2 RPE**

Swim down easily and finish before technique degrades.

Tempo Pull Set

Distance: 1.4 km | Duration: Variable

Controlled pull buoy tempo repeats that reinforce a firm catch and steady pressure.

Warm-up — **350**m @ **3 RPE**

Swim easy freestyle; use catch-up drill for the first 50 m, then settle into a long, relaxed stroke.

Repeat block — 4×

Work — **200**m @ **6 RPE**

Pull with a buoy, a firm catch and steady pressure; maintain controlled breathing and stroke length.

Recovery — **20**sec @ **Rest**

Rest at the wall; start the next repeat with calm breathing and deliberate form.

Cooldown — **250**m @ **2 RPE**

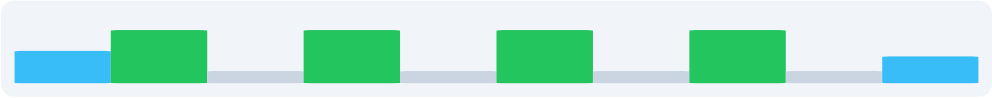

Swim down easily and finish before technique degrades.

CSS Threshold Swim

59

Distance: 1.2 km | Duration: Variable

Critical swim speed repeats that improve sustainable race-pace control.

Warm-up — **350**m @ **3 RPE**

Swim easy freestyle; use catch-up drill for the first 50 m, then settle into a long, relaxed stroke.

Repeat block — 4×

Work — **150**m @ **7 RPE**

Critical swim speed repeats that improve sustainable race-pace control. Hold the prescribed effort only while stroke length and breathing remain controlled.

Recovery — **20**sec @ **Rest**

Rest at the wall; start the next repeat with calm breathing and deliberate form.

Cooldown — **250**m @ **2 RPE**

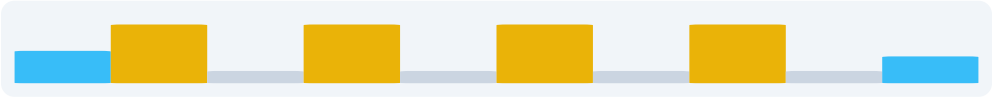

Swim down easily and finish before technique degrades.

VO2 Pace Swim

60

Distance: 1 km | Duration: Variable

Hard 100-metre repeats that raise aerobic power while preserving stroke length.

Warm-up — **350**m @ **3 RPE**

Swim easy freestyle; use catch-up drill for the first 50 m, then settle into a long, relaxed stroke.

Repeat block — 4×

Work — **100**m @ **8 RPE**

Swim hard while preserving stroke length and controlled breathing.

Recovery — **30**sec @ **Rest**

Rest at the wall; start the next repeat with calm breathing and deliberate form.

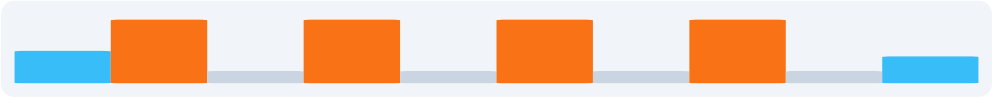

Cooldown — **250**m @ **2 RPE**

Swim down easily and finish before technique degrades.

Anaerobic 50s

Distance: 800 m | Duration: Variable

Short 50-metre efforts that develop repeatable speed with enough rest to protect technique.

Warm-up — **350**m @ **3 RPE**

Swim easy freestyle; use catch-up drill for the first 50 m, then settle into a long, relaxed stroke.

Repeat block — 4×

Work — **50**m @ **9 RPE**

Swim fast with repeatable technique; maintain controlled breathing and stroke length.

Recovery — **1**min **10**sec @ **Rest**

Rest at the wall; start the next repeat with calm breathing and deliberate form.

Cooldown — **250**m @ **2 RPE**

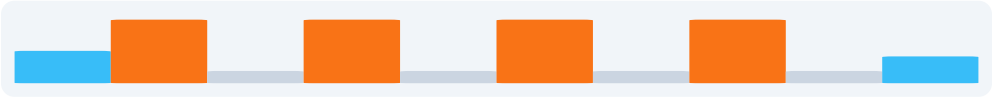

Swim down easily and finish before technique degrades.

Neuromuscular 25s

62

Distance: 700 m | Duration: Variable

Brief 25-metre accelerations that sharpen stroke timing with complete quality recovery.

Warm-up — **350**m @ **3 RPE**

Swim easy freestyle; use catch-up drill for the first 50 m, then settle into a long, relaxed stroke.

Repeat block — 4×

Work — **25**m @ **9 RPE**

Accelerate smoothly; preserve stroke timing, stroke length and controlled breathing.

Recovery — **1**min **25**sec @ **Rest**

Rest at the wall; start the next repeat with calm breathing and deliberate form.

Cooldown — **250**m @ **2 RPE**

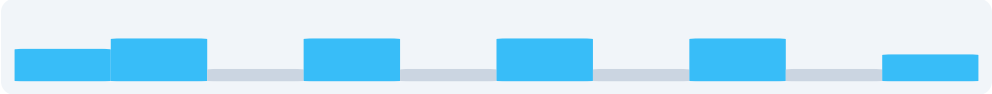

Swim down easily and finish before technique degrades.

Sighting Endurance Swim

63

Distance: 1.8 km | Duration: Variable

Aerobic freestyle repeats that rehearse lifting the eyes forward every six to eight strokes without breaking body line.

Warm-up — **350**m @ **3 RPE**

Swim easy freestyle; use catch-up drill for the first 50 m, then settle into a long, relaxed stroke.

Repeat block — 4×

Work — **300**m @ **5 RPE**

Swim aerobic freestyle; sight every 6–8 strokes without breaking body line. Keep breathing and stroke length controlled.

Recovery — **20**sec @ **Rest**

Rest at the wall; start the next repeat with calm breathing and deliberate form.

Cooldown — **250**m @ **2 RPE**

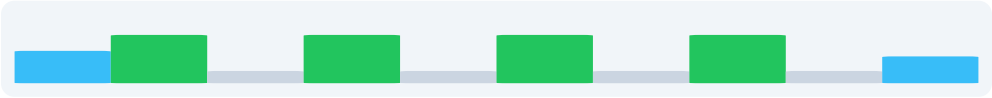

Swim down easily and finish before technique degrades.

Tempo Negative-Split Swim

64

Distance: 1.6 km | Duration: Variable

Tempo repeats that finish faster than they begin, teaching controlled pressure and a patient first half.

Warm-up — **350**m @ **3 RPE**

Swim easy freestyle; use catch-up drill for the first 50 m, then settle into a long, relaxed stroke.

Repeat block — 4×

Work — **250**m @ **6 RPE**

Start patiently and finish faster; maintain controlled pressure, breathing and stroke length.

Recovery — **25**sec @ **Rest**

Rest at the wall; start the next repeat with calm breathing and deliberate form.

Cooldown — **250**m @ **2 RPE**

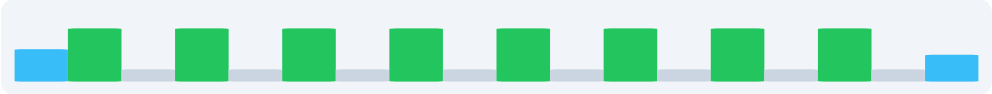

Swim down easily and finish before technique degrades.

Critical Swim Speed (CSS)

65

Distance: 1.4 km | Duration: Variable

A CSS-style repeat set with bounded repeat-volume states.

Warm-up — **400**m @ **3 RPE**

Swim easy freestyle and finish with a long, relaxed stroke.

Repeat block — 8×

CSS Work — **100**m @ **7 RPE**

Swim at individually estimated CSS pace at RPE 7 with a long, repeatable stroke.

Short Rest — **15**sec @ **Rest**

Take a short wall rest, then leave on the planned interval without rushing technique.

Cooldown — **200**m @ **2 RPE**

Swim down easy freestyle or backstroke.

Sprint Intervals

Distance: 2.4 km | Duration: Variable

High-intensity sprint intervals for speed development

Progressive Warm-up — **500**m @ **65%**THR

Swim 400 m easy freestyle, then build the final 100 m freestyle to prepare for speed.

Repeat block — 8×

- **Sprint** — **25**m @ **95%**THR
  Swim fast freestyle with a quick catch and clean body line.
- **Recovery** — **50**m @ **60%**THR
  Swim very easy backstroke or freestyle to recover.

Repeat block — 6×

- **Longer Sprint** — **50**m @ **90%**THR
  Swim fast freestyle with a controlled catch and stroke length.
- **Active Recovery** — **100**m @ **60%**THR
  Swim easy backstroke or freestyle.

Cool-down — **400**m @ **55%**THR

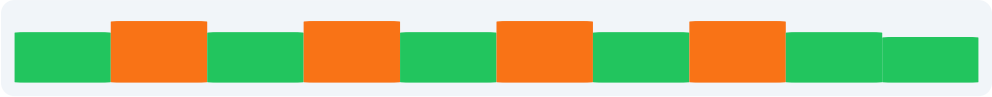

Swim very easy backstroke, breaststroke, or freestyle.

Threshold Set

67

Distance: 3 km | Duration: Variable

Sustained threshold efforts for lactate tolerance

Warm-up — **600**m @ **65%**THR

Swim 400 m easy freestyle, then use catch-up drill for 4×50 m before building the final 100 m freestyle.

Repeat block — 4×

- **Threshold Interval** — **400**m @ **85%**THR
  Swim freestyle at a steady, sustainable threshold effort with a firm catch.
- **Recovery** — **100**m @ **65%**THR
  Swim easy backstroke or freestyle to recover.

Cool-down — **400**m @ **55%**THR

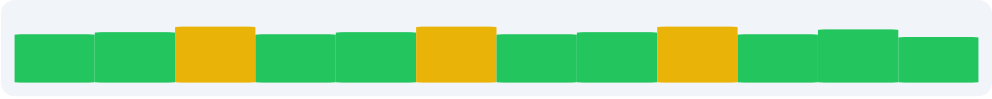

Swim very easy backstroke, breaststroke, or freestyle; float at the wall if needed.

Technique Focus

68

Distance: 2.15 km | Duration: Variable

Technical swimming session focusing on stroke mechanics

Easy Warm-up — **300**m @ **60%**THR

Swim easy freestyle and backstroke, focusing on feel for the water.

Repeat block — 3×

Freestyle Drills — **200**m @ **65%**THR

Swim catch-up, fingertip-drag, and single-arm freestyle drills.

Build Swimming — **150**m @ **75%**THR

Swim freestyle from easy to strong, building speed while maintaining technique.

Easy Recovery — **100**m @ **60%**THR

Swim easy backstroke or freestyle.

Mixed Strokes — **300**m @ **70%**THR

Swim backstroke, breaststroke, and freestyle with relaxed transitions.

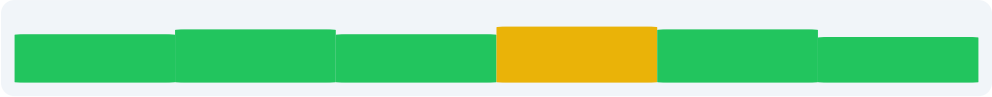

Cool-down — **200**m @ **55%**THR

Swim very easy backstroke, breaststroke, or freestyle.

Endurance Set

Distance: 3.5 km | Duration: Variable

Long aerobic swim for endurance base building

Extended Warm-up — **600**m @ **60%**THR

Swim 400 m easy freestyle, use catch-up drill for 4×50 m, then build the final 100 m freestyle.

Endurance Block 1 — **1.2**km @ **70%**THR

Swim freestyle at a steady aerobic effort with controlled breathing and stroke length.

Easy Recovery — **200**m @ **60%**THR

Swim easy backstroke or very easy freestyle.

Endurance Block 2 — **1.2**km @ **75%**THR

Swim freestyle slightly stronger than Block 1 while keeping the effort aerobic.

Variable Pace — **200**m @ **70%**THR

Swim 4×50 m freestyle, descending each 50 m from easy to strong while preserving stroke length.

Cool-down — **100**m @ **55%**THR

Swim very easy backstroke, breaststroke, or freestyle; float at the wall if needed.

WORKOUT CATALOG

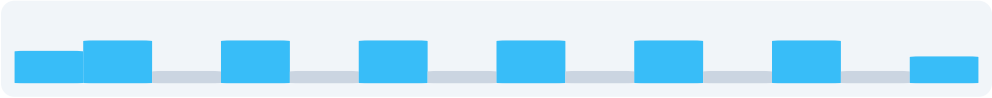

Strength

Movement Capacity Strength

71

Distance: Not prescribed · Duration: Variable

Full-range squat and hinge practice builds durable foundational strength.

Warm-up — **7**min @ **3 RPE**

Use joint circles, bodyweight rehearsal, and one lighter practice set before loading.

Repeat block — 3×

- **Goblet Squat** — **10**reps @ **5 RPE**
  Use a load that permits a controlled descent and stable foot pressure.
- **Rest** — **45**sec @ **Rest**
  Recover fully enough to repeat precise movement.

Repeat block — 3×

- **Romanian Deadlift** — **10**reps @ **5 RPE**
  Keep ribs stacked and stop a set if range or balance changes.
- **Rest** — **45**sec @ **Rest**
  Recover fully enough to repeat precise movement.

Cooldown — **5**min @ **2 RPE**

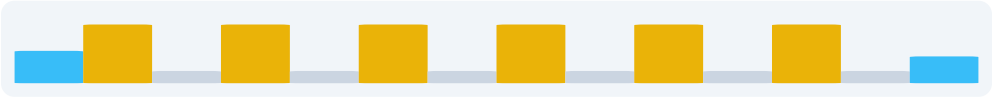

Walk briefly, then use comfortable range-of-motion work for the trained areas.

Compound Strength

72

Distance: Not prescribed · Duration: Variable

Lower-repetition compound lifting develops high-force strength with deliberate rest.

Warm-up — **7**min @ **3 RPE**

Use joint circles, bodyweight rehearsal, and one lighter practice set before loading.

Repeat block — 3×

Front Squat — **5**reps @ **8 RPE**

Choose a load that leaves about two clean reps in reserve; do not grind the final rep.

Rest — **3**min @ **Rest**

Recover fully enough to repeat precise movement.

Repeat block — 3×

Trap-Bar Deadlift — **5**reps @ **8 RPE**

Leave about two clean reps in reserve; reset your brace between repetitions.

Rest — **3**min @ **Rest**

Recover fully enough to repeat precise movement.

Continue →

Compound Strength · continued

Cooldown **5**min @ **2 RPE**

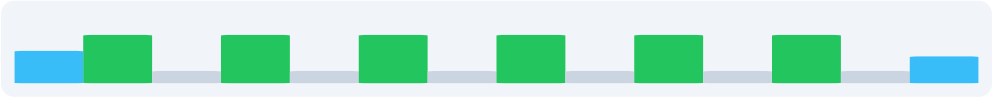

Walk briefly, then use comfortable range-of-motion work for the trained areas.

Single-Leg Control

74

Distance: Not prescribed · Duration: Variable

Unilateral leg work and anti-rotation control develop stable single-leg force.

Warm-up — **7**min @ **3 RPE**

Use joint circles, bodyweight rehearsal, and one lighter practice set before loading.

Repeat block — 3×

Rear-Foot Elevated Split Squat — **8**reps @ **6 RPE**

Use support if needed; keep the working knee tracking over the middle toes.

Rest — **1**min **15**sec @ **Rest**

Recover fully enough to repeat precise movement.

Repeat block — 3×

Single-Leg Romanian Deadlift — **8**reps @ **6 RPE**

Move slowly enough to keep the pelvis level on every repetition.

Rest — **1**min **15**sec @ **Rest**

Recover fully enough to repeat precise movement.

Continue →

Single-Leg Control · continued

Cooldown **5**min @ **2 RPE**

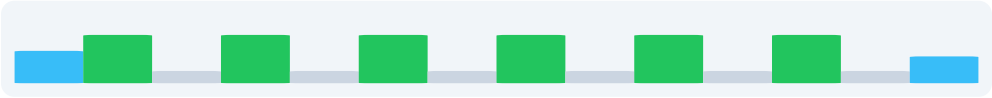

Walk briefly, then use comfortable range-of-motion work for the trained areas.

Power Production

76

Distance: Not prescribed | Duration: Variable

Low-repetition explosive movements develop force production while protecting landing quality.

Warm-up — **7**min @ **3 RPE**

Use joint circles, bodyweight rehearsal, and one lighter practice set before loading.

Repeat block — 3×

Kettlebell Swing — **6**reps @ **6 RPE**

Use a light, familiar load and end the set before speed declines.

Rest — **3**min @ **Rest**

Recover fully enough to repeat precise movement.

Repeat block — 3×

Low Box Step-Up Drive — **6**reps @ **6 RPE**

Step down under control; replace the drive with a low step-up if landing is noisy.

Rest — **3**min @ **Rest**

Recover fully enough to repeat precise movement.

Cooldown — **5**min @ **2 RPE**

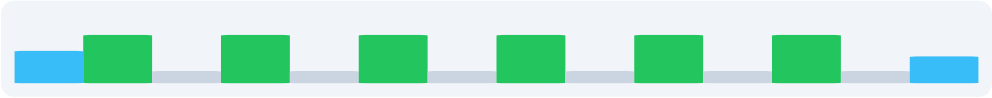

Walk briefly, then use comfortable range-of-motion work for the trained areas.

Trunk and Carry Strength

77

Distance: Not prescribed · Duration: Variable

Carries and trunk bracing develop posture and force transfer under controlled load.

Warm-up — **7**min @ **3 RPE**

Use joint circles, bodyweight rehearsal, and one lighter practice set before loading.

Repeat block — 3×

- **Farmer Carry** — **10**reps @ **6 RPE**
  Walk tall with quiet steps; reduce load before grip or posture fails.
- **Rest** — **1**min @ **Rest**
  Recover fully enough to repeat precise movement.

Repeat block — 3×

- **Half-Kneeling Pallof Press** — **10**reps @ **6 RPE**
  Keep hips and ribs square rather than twisting toward the band.
- **Rest** — **1**min @ **Rest**
  Recover fully enough to repeat precise movement.

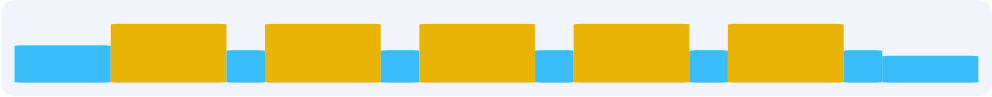

Cooldown — **5**min @ **2 RPE**

Walk briefly, then use comfortable range-of-motion work for the trained areas.

Full Body Circuit

Distance: Not prescribed · Duration: 50 min

High-intensity full body circuit training

Movement Prep — **5**min @ **4 RPE**

Dynamic movements to prepare entire body

Repeat block — 5×

Circuit Round — **6**min @ **8 RPE**

6 min: burpees, mountain climbers, squat jumps, push-ups, burpees, mountain climbers; each station is 45 sec work + 15 sec complete rest.

Active Recovery — **2**min @ **3 RPE**

Walk slowly and take six unhurried breaths before the next round.

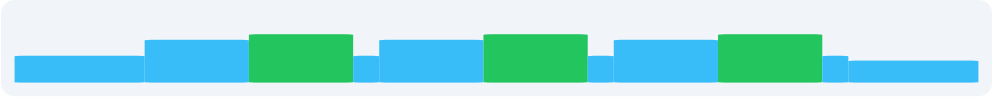

Recovery Stretch — **5**min @ **2 RPE**

Static stretches for all major muscle groups

Core and Stability

Distance: Not prescribed · Duration: 37 min

Focused core strength and stability training

Core Activation — **5**min @ **2 RPE**

Breathing exercises, gentle core engagement

Repeat block — 3×

Plank Variations — **4**min @ **5 RPE**

30 seconds front plank, 30 seconds left side plank, 30 seconds right side plank, 30 seconds front plank; repeat once (4 minutes total).

Dynamic Core — **4**min @ **6 RPE**

4 min: dead bug, bird dog, bicycle crunch, leg raise; 45 sec each + 15 sec transition. Alternate sides except on leg raises.

Recovery — **1**min @ **2 RPE**

Walk slowly and take six unhurried breaths.

Hip and Spine Mobility — **5**min @ **1 RPE**

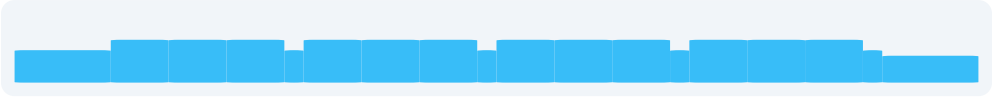

8 cat-cow repetitions, 8 hip circles each direction per side, then 8 spinal twists per side.

Functional Movement

80

Distance: Not prescribed | Duration: 50 min

Movement patterns for daily life and activity performance

Movement Preparation — **5**min @ **3 RPE**

8 hip circles per side, 8 shoulder circles each direction, then 8 bodyweight squats.

Repeat block — 4×

Squat Patterns — **3**min @ **5 RPE**

Perform controlled goblet squats for the full 3 minutes; reset posture between repetitions.

Hinge Patterns — **3**min @ **5 RPE**

Perform controlled Romanian deadlifts for the full 3 minutes; keep the spine neutral.

Push/Pull Patterns — **3**min @ **5 RPE**

Perform controlled push-ups for the full 3 minutes; use a stable elevated surface if needed to keep the same movement pattern.

Transition — **1**min @ **3 RPE**

Walk slowly, take six unhurried breaths, and set up for the next round.

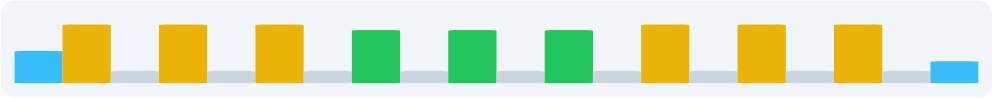

Movement Integration — **5**min @ **2 RPE**

Walk slowly for 2 minutes, then complete 8 cat-cow repetitions and 8 standing reaches per side.

Upper Body Strength

Distance: Not prescribed · Duration: Variable

Build upper-body muscle and strength. Adjust load to finish the prescribed reps with clean form; extend rest if performance drops.

Warm-up — **5**min @ **3 RPE**

Dynamic stretching and mobility

Repeat block — 3×

- **Bench Press** — **8**reps @ **8 RPE**
  Choose a load that leaves about two clean reps in reserve; use safeties or a spotter.
- **Rest** — **2**min @ **Rest**

Repeat block — 3×

- **Bent Over Rows** — **10**reps @ **7 RPE**
  Leave about three clean reps in reserve; keep the torso stable without jerking.
- **Rest** — **2**min @ **Rest**

Repeat block — 3×

- **Overhead Press** — **8**reps @ **8 RPE**
  Leave about two clean reps in reserve; stop before leaning back or grinding.
